

Twin™ Shoes Barefoot Benefits...Inspired by Nature | Backed by Science

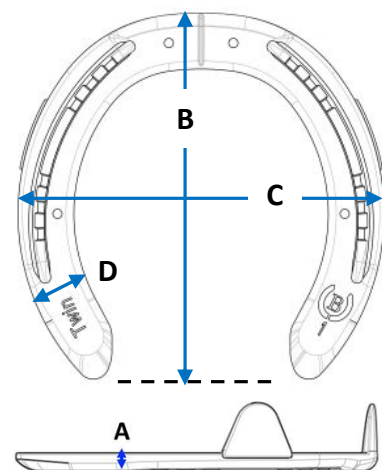

- **Science-backed** usage of split-shoe hoof care concept
- **Allows for natural hoof flexibility** and improved biomechanics
- **Helps improve healthy hoof growth** and blood flow
- **Provides both preventive and therapeutic** benefits to a wide range of conditions
- **Applied similar** to traditional one-piece, nail-on steel shoes
- **Great for transitioning** to and from barefoot
- **Multi-use design** allows usage as a split-shoe, one-piece shoe, or therapeutic one-piece with pads or add-on modifications

TR | Twin™ Rider versatile design for both English and Western disciplines

- **High quality steel** provides optimal combination of workability and wear
- **Forged groove lines** accurately indicate split location and minimizes cutting effort
- **Two toe clips** provide maximum shoe stability once the shoe is cut through
- **Side clips** positioned and sized for optimal stability and reduced hoof horn stress
- **Sole relief** allows for wider branch width; more support without excess sole pressure
- **Forged dimples** indicate widest point of shoe
- **Six nail holes** positioned for nail placement flexibility, reduced heel wear, etc.
- **Non-centered U-shaped crease** provides good nail fit with optimal and safe nailing farther back
- **Sweep** allows for easy pitch adjustment
- **Toe support/breakover** rounded with a broad ground surface to provide propulsion at push-off
- **Pencil heels** allow for natural slide/roll at impact reducing torque on distal limb
